# Content

## Lean Yellow Belt enables you to participate in Lean transformations

This is an online Lean education. Through five webinars, video material, online presentations and case assignments we'll provide you with an thorough introduction to the Lean mindset and a skill-set within the necessary tools.

### New tools in your toolbox

You'll get training in several Lean tools with focus on Value Stream Mapping and Kaizen Board meetings in particular. The training is practically oriented, not only focusing on theoretical concepts but examples and exercises ready to be put to use.

### Online access to material

The training is performed on our training platform called 'Moodle'. You'll get exclusive access to all material, which can be downloaded free of charge. We provide support and coaching to all exercises and constructive feedback when solved.

### Is this education for you?

The training leaves you with a proper understanding of what Lean is about - and it enables you to actively participate in a Lean implementation. By completing your Lean Yellow Belt, you will gain a 2-day credit for the next level of education - the Lean Green Belt

### Content of the education:

You must attend 5 webinars of approx. 1 hour duration. After each webinar, tasks must be solved, which are uploaded by answering. All webinars are recorded meaning you can manage your own time.

#### Webinar 1

- Introduction to the Lean background
- The 5 Lean Principles
- Create customer value
- The 8 types of waste

#### Webinar 2

- Overview of the Lean toolbox
- 5S - order and tidiness
- Kanban - let the customer pull the product
- SMED - Single-Minute Exchange of Dies
- Standardized work - minimization of variance

#### Webinar 3

- Process mapping
- Data collection and fact box
- Suggestions for improvement
- Prioritization and execution

#### Webinar 4

Performance management  
Design principles  
Value Stream Mapping - future state

#### **Webinar 5**

Kaizen - continuous improvements  
Stand-up meetings  
Visual management  
Challenges in relation to implementation

#### **Examination**

A multiple choice test consisting of 20 questions

#### **Disciplines**

Lean mindset - understanding Lean and how it should be practiced.  
Lean toolbox - insight into the most important Lean tools and methods  
Value Stream Mapping - training in the performance of process mappings  
Kaizen - the power of continuous improvements with employees engagement

#### **Prerequisites**

No prior knowledge of Lean is required to participate. We start from scratch and guide you through the training and examination.

#### **Yield**

The education enables you to actively participate in a Lean implementation. You will gain an understanding of Lean principles and the necessary skillset within important tools.

# Teaching

## **Professional teachers with passion**

Lean Akademiet loves teaching. We're passionate and go all in when it comes to making you an expert in Lean. One thing is for sure; the theoretical knowledge, the level of experience and spirits are higher than anywhere else. We are looking forward to seeing you!

## **Facilities**

Assuring the academic and theoretical part of a course is not everything. We believe that learning has the best prerequisites when performed on a suitable online teaching platform. That's why we use our own platform called 'Moodle', where you'll be presented with presentations, assignments, videos and more.

## **Webinars and Moodle**

All online teaching takes place on our own platform on Moodle. Here we meet at the webinars and review the day's material, do small exercises and cases. Here you will find all teaching material such as presentations, exercises and cases, data templates and instructional films.

## **Instructional films**

In Moodle you will find our instructional films, which introduces you to the various tools and methods. Watch the films in preparation for the individual modules. You have access to the Moodle platform for six months so you can come back to browse materials and re-watch films.
